

Results of the Team Shoot, September 10, 2005

Thanks for coming out, I was glad to see all of you out there. If this was your first time shooting PPC, you probably found it to be a humbling experience, I know I really did the first time I shot it, and I keep getting humbled each time I shoot it.

Shooting a discipline like PPC really reminds me how much work I have to go on getting better accuracy, which will improve all other aspects of my shooting. I hope to see all of you out at our next match, which will be a 3-gun match at the Training Bureau on Saturday, October 1, 2005. That should be a good time.

This list is only going out to those who participated in this shoot. The Newsletter will have only the top few spots for each stage, and overall. Some folks did not make it on the roster so will not be added to the mailing list, please check with those who came with you to see if they got this and the newsletter.

By the way, we had a couple scores that had some math issues and it changed a couple of overall scores. When I made this results sheet up, I made an Excel spread sheet and just plugged in the numbers to get the overall scores, so these should be pretty accurate results.
